### Our tips for measuring feet:

- 1 As feet can vary in size, be sure to measure both feet.
- 2 As the feet can expand during the day, measure in the afternoon or evening if possible.
- 3 Be sure to measure the feet while standing.
- 4 Gently stroke the toes before measuring so that they are relaxed and loose when measuring.
- 5 Room to grow and unroll is already taken into account in our sizes.

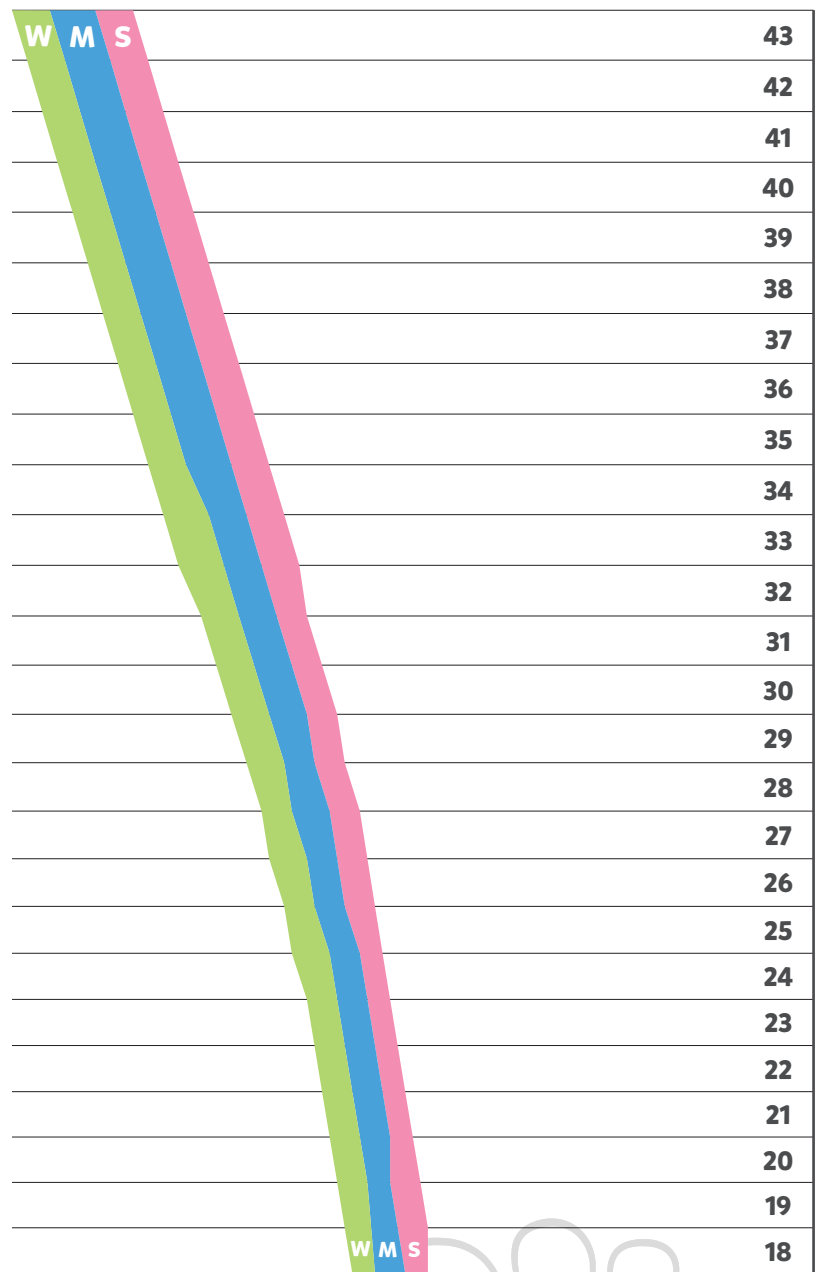

Passt natürlich.

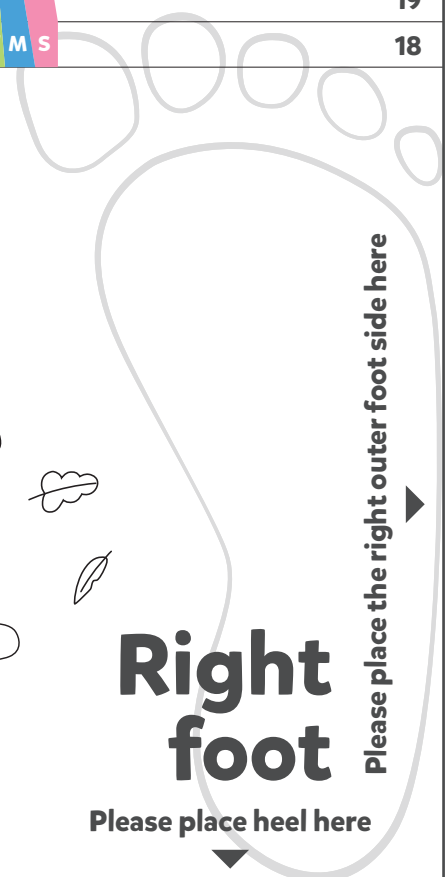

This is only a recommendation according to WMS. To be on the safe side, please have your feet measured in a specialist shop.

### IMPORTANT:

It is best to print the template double-sided, on A4 format, with 100% size and check the scale.

S / NARROW  
M / MEDIUM  
W / WIDE

**Right foot**

Please place the right outer foot side here

Please place heel here
